

Association of
Greater Manchester Authorities

Planning for Waste in Greater Manchester

STAKEHOLDER EVENT 1 17th October 2006

WORKSHOP 3

1. Introductions
2. Complete the Group attendance sheet
3. Workshop Introduction (Facilitator)
4. Nominate a scribe and reporter

Planning for waste in Greater Manchester is a complex process given the number of Waste Planning Authorities and the nature of the conurbation / urban area.

As a result there are likely to be a number of key issues and associated options for addressing them.

As a Group identify what you believe are the key issues and using the topic papers and matrices provided record why you consider this to be the case and discuss the means by which these issues can be overcome.

Consider the following as a starting point:

- Availability of data on all waste streams
- Achieve appropriate targets
- Different type of technology
- Availability of sites
- Scale of facilities
- Interfaces with adjoining authorities
- Meeting objectives of all the authorities
- Meeting government objectives
- Transport

Prior to completion of Workshop 1 identify the 3 most important issues and rank them in order of priority (1 being the most important).
